The expert accessories 36

Assortment overview 38

Perfect writing instruments, whatever the surface.

Whether you want to label a metal plate or mark a piece of wood or stone, we can always guarantee great results with our marker range. Even special requirements like a high UV resistance, or even the usage on coated surfaces, we have Lumocolor marker for the job.

Not looking for a permanent solution? Our Lumocolor non-permanent markers allow for marking and labelling which can be removed easily from many smooth surfaces.

DRYING OUT
DRY SAFE
PROTECTION

Innovation is our driving force.

Several of our Lumocolor products feature the innovative DRY SAFE-Technology. Everybody knows the issue: on one side, we want the ink to dry fast on surfaces but on the other side, we do not want the pen to dry out if we forget to put the cap back on. When finding a solution we were inspired by nature. Many fruits and leaves protect themselves from drying up with a wax film. We have applied this principle to our products which not only increases the longevity of the products but also allows to leave the pens uncapped for days without any quality loss.

We want to provide you with the best results.

With our products, we want to support you whatever the situation: whether in crafts or in the office, in a factory or outside, our Lumocolor products are manufactured to meet your requirements, in terms of their performance but also their environmental qualities.

97% RECYCLED PLASTIC*

*according to ISO 14021 (barrel, cap and end cap)

Responsibility for the environment.

Ecology is more than just a word to us.

To be able to guarantee a high level of quality and innovative strength, the Lumocolor assortment is manufactured exclusively in Germany. During this process, we are fully conscious of our responsibility towards people and the environment. As such, the barrel and cap of our Lumocolor products are made from polypropylene which ensures a long service life. Together with our Lumocolor refill ink, which is available for many of our Lumocolor products, they will become long-term companions. We highly value this longevity because what lasts longer must only be replaced much later.

All four German production sites have been manufacturing using 100% green electricity since 2021

By 2030, we will increasingly use energy from renewable sources that we generate ourselves or through direct investments.

Housing made of 97% recycled plastic.

We have started a changeover of our Lumocolor assortment to recyclate. This means that the housing (barrel, cap and end cap) of the respective Lumocolor markers and pens, is no longer made of brand-new plastic, but of 97% recycled plastic, specifically of recycled polypropylene. Step-by-step we will continue the changeover of the Lumocolor assortment to recycled plastic. We anticipate the majority of products will have fully transitioned to the new barrels in 2025.

With a usage of around 200 tons of recyclate for Lumocolor in 2023, this measure is an important contribution to the reduction of CO_2 emissions and the protection of our environment and climate. Of course when using recycled granulate, the Lumocolor quality remains the same.

Lumocolor® permanent special 319

Permanent special pens

- The Lumocolor special markers adheres to many special surfaces which other permanent pens do not
- The Lumocolor permanent special (S and F) can be used for special applications such as coated surfaces, nano coatings, optical glass, laboratory glass, silicone, laminating film and newest generation of optical glass
- The Lumocolor permanent Laundry Marker is waterproof for marking permanently on textiles, such as labels in shirts etc.
- Lumocolor® permanent Garden Marker is a weatherproof marker for outdoor applications such as labels, signs, flowerpots, etc.
- Excellent smudge-proof and waterproof qualities on most surfaces
- Dries in seconds, therefore ideal for left-handed users
- Colour-intensive, low-odour
- Extremely lightfast (on smooth surfaces: black for 7 years, on paper considerably longer)
- Airplane-safe – automatic pressure equalization prevents pen from leaking on board aircraft
- PP barrel and cap guarantee long service life
- This range has transitioned to the new 97% recycled plastic housing
- Produced with 100% green electricity

- Impossible to overfill
- Content 30 ml

Lumocolor® non-permanent omnichrom 218

Water-soluble lead

- Refill leads for Lumocolor® non-permanent omnichrom leadholder 768
- For opaque marking on almost all surfaces even on dark or transparent ones, e.g. paper, plastic, metal, glass, wood, leather and stone
- Can be wiped off many smooth surfaces
- Length 70 mm, Ø approx. 3 mm
- 12 leads per box
- Available in 4 colours

The refilling itself is very easy

Simply **insert the pen or marker into the respective refill station**. The marker **stays in a standing position** in the refill. Only minutes later the pen is ready for use and after a few hours it is completely refilled. It is **impossible to overfill as the pen** can only draw its own maximum ink content out of the refill station. And that easily your **pens are ready for action again.**
